For every test that you wish the tester to perform, include a table with the following structure. Check your theory lecture notes to learn about some typical test

Test <#1>	
Description	<i>The only user who can create an actor must be the writer of the article. The areas of 'Title' and 'Description' are obligatory and the area of 'URL of optional pictures' must start with "www. THEURL" and separated by ' , '.</i>

Expected	<i>The system must return the user to the follow-up list of the named article and showing the follow-up that we have created before.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>The user only fill the part of title, letting the description's area empty.</i>
Expected	<i>The system must return an error message explaining that we need the description box full too with words.</i>
Outcome	
Notes	

Test <#3>	
Description	<i>The user only fill the part of description, letting the title's area empty</i>
Expected	<i>The system must return an error message explaining that we need the title box full too with words.</i>
Outcome	
Notes	

Use case UC14 Post a Chirp

Description

A user can post a chirp including the regarding information and then clicking to "save".

Access

Main Menu > Chirps > Create

Tests

Test <#1>	
Description	<i>The user must post a chirp including the information in Title and description.</i>
Expected	<i>The system must return the user to the chirps list that the user will see in this Chirp-Line.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>The user only fill the part of title, letting the description's area empty.</i>

Expected	<i>The system must return an error message explaining that we need the description box full too with words.</i>
Outcome	
Notes	

Test <#3>	
Description	<i>The user only fill the part of description, letting the title's area empty</i>
Expected	<i>The system must return an error message explaining that we need the title box full too with words.</i>
Outcome	
Notes	

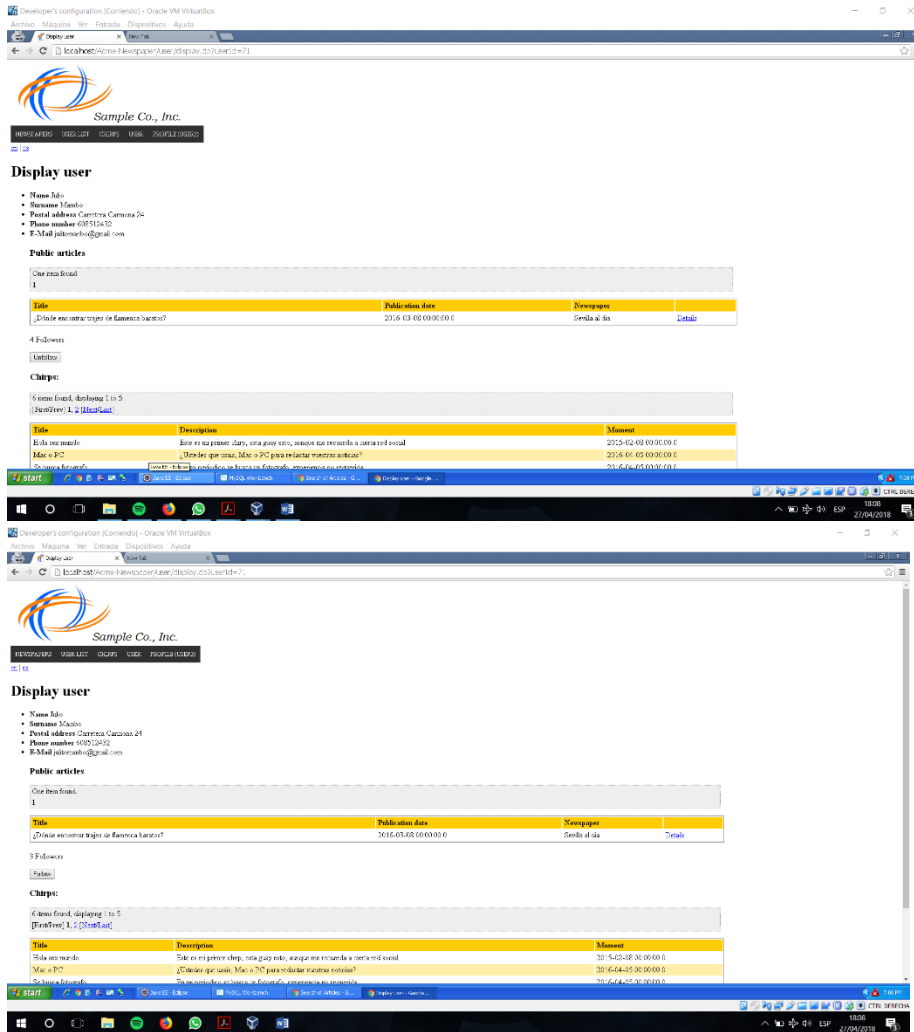

Use case UC15 Follow/Unfollow another user

Description

A user of the system can have followers and he/she can follow to other users for seeing their chirps at current time.

Access

Main Menu > Profile > Display User > Followers / Following > See Profile > Follow / Unfollow

Tests

Test <#1>	
Description	The user can follow and unfollow the user with only clicking the correspondent button.
Expected	The user can see that his number of 'followings' increase and decrease. We can see the same in 'followers' for the other person.
Outcome	
Notes	

Use case UC16 List my following users.

Description

A user can see the list of users that he follows to see their chirps

Access

Main Menú > User > Display User > Following

Tests

Test <#1>	
Description	<i>A login user enters with normality in his profile and click on the list, then it will appear.</i>
Expected	<i>The system must return a table with name, surname, email and the action to see their profile.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>A non-authenticated user try to enter by URL on the list of following user.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Use case UC17 List my follower users.

Description

A user can see the list of users that are following him/her to see his/her chirps

Access

Main Menú > User > Display User > Followers

Tests

Test <#1>	
Description	<i>A login user enters with normality in his profile and click on the list, then it will appear.</i>
Expected	<i>The system must return a table with name, surname, email and the action to see their profile.</i>
Outcome	
Notes	

Test <#2>	
-----------	--

Description	<i>A non-authenticated user try to enter by URL on the list of follower users.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Use case UC18 List the “Chirp Line”.

Description

A user can see the chirps that he and his followings are writing in order of creation.

Access

Main Menú > Chirp

Tests

Test <#1>	
Description	<i>A login user enters in the system with normality to see the current chirps of him and his followings.</i>
Expected	<i>The system must return a list with the user, the moment, the title and the description.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>A non-authenticated user try to enter by URL on the list of chirps.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Use case UC19 Create taboo words

Description

An administrator of the system can create new taboo words.

Access

Login as Administrator > Main Menu > Administrator > Spamwords List > Create

Tests

Test <#1>	
Description	<i>A login administrator enters to the spam words list and create an spam word filling the name box.</i>
Expected	<i>The system must return a list of spam words where our spam word it's contained in.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>A login administrator enters to the spam words list and create an spam word without filling the name box.</i>
Expected	<i>The system must return a control error message showing that this box need to be filled with a string.</i>
Outcome	
Notes	

Test <#3>	
Description	<i>A non-authenticated user tries to enter by URL on the create spam words view, the system must show de login view.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Test <#4>	
Description	<i>An authenticated different role tries to enter by URL on the create spam words view, the system must show the login view.</i>
Expected	<i>The system must show a view explaining that he/she has not access to that view.</i>
Outcome	
Notes	

Use case UC20 Edit taboo words

Description

An administrator of the system can edit current taboo words.

Access

Login as Administrator > Main Menu > Administrator > Spamwords List > Edit

Tests

Test <#1>	
Description	<i>A login administrator enters to the spam words list and edit a spam word filling the name box.</i>
Expected	<i>The system must return a list of spam words where our spam word it contained in.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>A login administrator enters to the spam words list and edit an spam word without filling the name box.</i>
Expected	<i>The system must return a control error message showing that this box need to be filled with an string.</i>
Outcome	
Notes	

Test <#3>	
Description	<i>A non-authenticated user tries to enter by URL on the edit spam words view, the system must show de login view.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Test <#4>	
Description	<i>An authenticated different role tries to enter by URL on the edit spam words view, the system must show de login view.</i>
Expected	<i>The system must show a view explaining that he/she has not access to that view.</i>

Outcome	
Notes	

Use case UC21 Delete taboo words

Description

An administrator of the system can edit current taboo words.

Access

Login as Administrator > Main Menu > Administrator > Spam words List > Edit > Delete

Tests

Test <#1>	
Description	<i>A login administrator enters to the view of editing a spam word and click the button 'delete'</i>
Expected	<i>The system must return a list of spam words where our spam word it's not contained in.</i>
Outcome	
Notes	

Test <#2>	
Description	<i>A login administrator enters to the spam words list and edit an spam word without filling the name box.</i>
Expected	<i>The system must return a control error message showing that this box need to be filled with a string.</i>
Outcome	
Notes	

Test <#3>	
Description	<i>A non-authenticated user tries to enter by URL on the edit spam words view, the system must show de login view.</i>
Expected	<i>The system must return the user to the login view.</i>
Outcome	
Notes	

Test <#4>	
-----------	--

Description	<i>An authenticated different role tries to enter by URL on the edit spam words view, the system must show de login view.</i>
Expected	<i>The system must show a view explaining that he/she has not access to that view.</i>
Outcome	
Notes
