Bug in use case UC-34 List folders	14

Bug in use case UC-01 Register as a user

Description

Once an unauthenticated user is registered, they are redirected to the list of users in the system instead of the welcome message.

Results

The bug was successfully detected by the tester.

Bug in use case UC-06 Search for a published newspaper

Description

The search function only searches for keywords within the description of the newspapers, instead of the title, summary and description.

Results

The bug was successfully spotted by the tester.

Bug in use case UC-11 Publish a follow-up

Description

A user can create follow-ups with null titles.

Results

The bug was successfully spotted by the tester.

Bug in use case UC-03 Browse the newspapers' articles

Description

Some column titles are displayed in Spanish when browsing the application in English: summary isn't translated and the publication date is displayed as "Fecha de publication."

Results

The bug was successfully detected by the tester.

Bug in use case UC-15 Post a chirp

Description

The cancel and the save buttons have their functionality swapped. Therefore, to save the new chirp you must click "Cancel" and to cancel the operation you must click "Save".

Results

The tester found the bug successfully. They tested both buttons and found out what the problem was.

Bug in use case UC-19 List followed users' chirps

Description

When attempting to browse the followed users' chirps, the system displays the chirps of the user that is currently logged in.

Results

The tester found the bug successfully. They realized that the button redirected to the wrong location, therefore showing the wrong stream of chirps.

Bug in use case UC-24 Subscribe to a private newspaper

Description

When attempting to create a new NewspaperSubscription, the credit card isn't validated: some of its fields aren't checked properly.

Results

The tester found the bug successfully.

Bug in use case UC-27 Create an advertisement

Description

An agent can create an advertisement with a null title.

Results

The tester found the bug with no problems.

Bug in use case UC-27 Create an advertisement

Description

After saving a new advertisement, the agent was automatically logged out.

Results

The tester was able to find the bug with no trouble.

Bug in use case UC-28 Subscribe to a volume

Description

When attempting to create a new VolumeSubscription, the credit card isn't validated: some of its fields aren't checked properly.

Results

The tester found the bug successfully.

Bug in use case UC-32 List newspapers without an agent's advertisements

Description

The list of newspapers with no advertisements and the list of newspapers with advertisements are swapped.

Results

The bug was successfully detected.

Bug in use case UC-34 List folders

Description

The link of children folder and the link of display message of said folder are swapped.

Results

The bug was successfully detected by the tester.
